

Valentine Décor... Simple and Beyond!

BY CHRIS FRANCI

Looking to create a stunning tablescape for a special Valentine dinner? Designing a unique table setting can be fun and can contribute to a memorable event. We present two design ideas—one simple and elegant, another, over-the-top beautiful...

Less is More

Place a white gift box (with a special gift inside) tied with a ribbon on a red-rimmed, white plate. For that special, elegant touch, wrap ribbon around gold and white utensils. Add a festive valentine flair to the design by positioning a gold-themed heart on the plate.

More is More!

There is nothing simple about this place setting, and I bet we all know someone who would love this design! To achieve this look, you will need a white table or cloth and white plates. The white backdrop is important to make the circular design stand out. Then, take your favorite colorful design elements and position them around the plate.

This is relatively easy to create, and presents a stunning place setting!
